EXPERIENCE
(recent selections)

April 2012 - PRESENT **EatRadar.com**
- designed all UI which involved the utilization of Twitter Bootstrap and Zurb Foundation, plus extensive use of jQuery and AJAX to communicate with the server
- used Google Maps API extensively to create a custom drag & drop search interface
- Facebook Open Graph and OAuth integration
- utilized localStorage to improve UX by ensuring user data was not lost prematurely

2012 / 2013 **EphinStore.com**
- website redesign and implementation on top of an existing installation of ZenCart
- currently porting design over to a custom WordPress theme and making the design responsive

2012 **Stompdown.ca**
- converted site from Joomla to WordPress
- created a custom theme to visually match another of the company's sites (ephin.com)
- used custom post attributes to create a custom loop on the homepage
- made site responsive and easily accessible from any device

2009 - PRESENT **HipHopVancouver.com**
- co-founder
- logo design and branding across all social networks
- website built on Joomla CMS (being ported to WordPress)
- produce video content for YouTube channel HHVtv including all motion graphics (60 videos)
- act as executive editor and organizer over a team of writers and content generators
